CAREER SUMMARY

A highly motivated and versatile professional with a strong background in Electrical/Electronics Engineering, enhanced by certifications as a Frontend Web Developer (Dev Career Tech Programme, UK-Nigeria Tech Hub) and Graphic Designer (Dominion Harvest Church International). I hold a National Diploma and a Higher National Diploma in Electrical/Electronics Engineering from Yaba College of Technology, complemented by additional certification in Cinematography from AI Multimedia Lagos. With expertise in Project Management, Event Planning, Financial Management, Frontend Development, and Visual Media, I offer a distinctive combination of technical acumen and creative insight. I thrive in dynamic settings, leveraging my engineering knowledge and digital media skills to deliver innovative, high-impact solutions.

WORK EXPERIENCE & YEAR

Balosh Integrated Limited - Lekki, Lagos

Post: Personal Assistant to MD and Support Engineer

YEAR: 2025 TILL DATE

Key Responsibilities:

Access Control Management	Oversees the systems (key cards, biometrics, keypads, etc.) that grant or restrict entry to authorized personnel in specific areas. This includes programming, user setup, monitoring logs, and troubleshooting to maintain security.
Car Park Safety	Implemented and monitored safety procedures within the parking facility. This involves CCTV monitoring, ensuring clear signage, managing traffic flow to prevent accidents, and coordinating security patrols.
Toll Road and Traffic Management	Managed the operational flow of vehicles and ensuring efficient payment collection on a toll road or managing traffic systems. This includes monitoring toll booth equipment and coordinating with local traffic agencies.
Automated Entrance	Installed, maintained, and programmed of automated entry systems (like boom barriers, turnstiles, or automatic doors) to ensure smooth, reliable, and secure entry/exit for users.
Smart Lock Installation	Physically installed and set-up electronically-controlled locks (often connected to a network via Wi-Fi or Bluetooth) on doors, and integrating them with the overall access control system for remote management.
Sliding Gate Installation	Assembled, wired, and tested motor-driven sliding gate systems. This includes setting limit switches, ensuring smooth track operation, and integrating the gate motor with access control devices (e.g., card readers or remotes).
Magnet Lock Installation	Fixed and wired electromagnetic locks (maglocks) to doors and frames. This involves calculating the appropriate holding force and integrating the lock with a power supply and an exit device (like a request-to-exit button or motion sensor).

Mountain of Fire Ministry (MFM) TMPM Lekki, Lagos

Post: Media Personnel

YEAR: 2022 TILL DATE

Key Responsibilities:

Video Coverage:	Operated cameras to capture high-quality video footage for church services, events, and programs.

Sound Checks:	Conducted audio checks to ensure optimal sound quality during services and events.
Video Switching:	Controlled video switchers to seamlessly transition between camera feeds, graphics, and other visual elements.
Visual Enhancements:	Implemented visual effects, graphics, and overlays to enhance video presentations.
Event Coverage:	Provided multimedia support for conferences, workshops, and special events.
Live Broadcast:	Assisted in broadcasting live services and events on various platforms.
Team Collaboration:	Worked closely with production team members to achieve smooth service executions

Justfood Nigeria Ltd Ajah, Lagos

Post: Technician

YEAR: 2022 – 2023

Key Responsibilities:

Document Management:	Maintained accurate records of machine maintenance, repair, and testing.
Preventive Maintenance:	Conducted periodic maintenance on ice cream, ice cube, frying, and oven machines to ensure optimal performance.
Fault Diagnosis & Repair:	Identified and resolved technical issues with machines, minimizing downtime.
Quality Control:	Tested new machines before delivery to ensure compliance with quality standards.
Troubleshooting:	Applied analytical skills to diagnose and resolve complex technical problems.
Technical Support:	Provided assistance to clients and internal teams on machine operation and maintenance

Frankbold Electrical Ago, Lagos

Post: Electrical Construction Assistant

YEAR: 2021 – 2022

Key Responsibilities:

Conduit System Installation:	Installed and maintained electrical conduit systems to ensure secure and efficient wiring pathways.

Circuit Wiring & Fault Diagnosis:	Wired circuits and diagnosed electrical faults to restore functionality and prevent system failures.
Installations and Repairs:	Executed basic electrical installations and repairs to support operational needs and infrastructure reliability.
System Testing and Inspection:	Tested and inspected electrical systems for functionality and reliability to guarantee performance standards.

Achievements

Leadership in Website Development:	Served as **Team Lead** at DeV Career, successfully overseeing the development of a mini website, ensuring timely delivery and functionality.
Directing Multimedia Projects:	Acted as **Director of Videoshoot** at AI Multimedia Academy, managing creative production and delivering high-quality video content.
Social Leadership in Engineering:	Held the role of **Social Director** for the Department of Electrical and Electronics Engineering, fostering community engagement and student camaraderie.
Committee Contribution:	Served as a **Committee Member for Social Activities** in the School of Engineering, organizing impactful events to enhance student life.
Outstanding Coaching:	Recognized as **Best Coach** for the School of Engineering in the 2024/2025 session, inspiring and guiding peers to excel.
Exemplary Social Engagement:	Honored as the **Most Social Student** in the Department of Electrical and Electronics Engineering for building strong interpersonal connections.
Executive Recognition:	Received the **Merit Executive Award as Social Director** for exceptional leadership and dedication to departmental initiatives.
